2019 - 2020

Middle School Math Club (6th through 8th grade)

Course Description: Our time in class will be spent covering various math concepts that should enhance any math curriculum. We will cover these concepts using games as well as traditional methods. Some, if not most, concepts will be review; others will be new. Some concepts we may cover will be the real number system (rational numbers, integers, whole numbers, natural numbers and irrational numbers), percentages, probability, LCM and GCF, prime factorization, simple graphing, absolute value, inequalities, scientific notation, radicals, mean median, mode and others as needs arise.

I truly love math and desire to instill a love of math in each child. It is math, however, and somehow there are people who shy away from it. I would desire to have each child embrace math as a challenge and not shy from it as something to avoid. I hope that each will realize that we learn by getting wrong answers, we grow by trying again, and we conquer one step at a time. That is why math is fun! Like a puzzle or video game, a wrong answer simply means try again before leveling up. This class has no grades and thus no chance to fail...only chances to level up as each concept is conquered.

Prerequisite: none

Instructor: Mrs. Bobbie Gregg. Mrs. Gregg has 19 years of experience homeschooling her own (4 grown) 8 children. She has taught tutorial classes in the Greater Birmingham Area for elementary Science, History, Writing, and Math, as well as high school Writing, and Math classes. She loves to teach and loves to learn. She hopes to aid each student in loving the process of learning about God's world...whether that be the numbers in our world or the leaves on the trees. It is her goal that each child would see the wonder in all of creation. She is married to Richard Gregg and has 8 children and 5 grandchildren with one more grandson to arrive soon.
