2020 - 2021

Algebra 2 with Trigonometry (10th through 12th grade)

Course Description: This tutorial in Algebra 2 with Trigonometry will cover the topics needed for Algebra 2 and beginning Trigonometry in one year. Some of those topics are as follows: Equations and Inequalities, Linear Functions and Systems, Parent Functions and Transformations, Solving Quadratics and Complex Solutions, Polynomial Functions, Radical Functions, Exponential and Logarithmic Functions, Rational Functions, Conic Sections, Sequence and Series, Probability and Statistics, and Trigonometry. We will meet 2 days a week and the material will be covered at a fairly brisk pace. I will provide the curriculum on the first day of class. Students will be expected to complete homework every day. Their grade will be derived from class work, quizzes, homework, notebooks, and tests.

Students must have instructor approval to register for this class. This is to ensure that any missed concepts will not hinder participation in this class.

Prerequisite: Successful completion of Algebra 1.

Instructor: Mrs. Bobbie Gregg. Mrs. Gregg has 20 years of experience homeschooling her own (4 grown) 8 children. She has taught tutorial classes in the Greater Birmingham Area for elementary science, history, writing, and math, as well as high school writing, and math classes. She loves to teach and loves to learn. She hopes to aid each student in loving the process of learning about God's world...whether that be the numbers in our world or the leaves on the trees. It is her goal that each child would see the wonder in all of creation. She is married to Richard Gregg and has 8 children and 7 grandchildren.
